

## **Waiting to see Doctor?**

One of our friendly nurses may call you first to triage you.

## **What is triage?**

Triage is when the nurse conducts some basic observations for a patient before they go in to see the doctor. This may include blood pressure, pulse, height, weight, and temperature.

## **Why do we triage patients?**

- Improving overall patient flow;
- Reducing your waiting time;
- Speeding up your doctor consult;
- Assisting doctor to run on time.
